

## JB POOL CONSTRUCTION

# RESORT-STYLE LUXURY

CONVENIENCE AND QUALITY

JB Pool Construction created this spacious resort-style pool with exercise and relaxation in mind. Designed by Paul Clout Design, the landscaping includes decorative features that emanate a Noosa aesthetic.

The pool measures 15.5m x 4.8m and is perfect for exercise, while the sheltered deck is fantastic for relaxation. The warm, dark wood of the sheltered area contrasts with the rest of the space, while being cohesive with the timber flooring within the home.

Different forms of limestone were used throughout the coping and wet areas, which brings a luxurious touch to the space. Pandanus and other tropical plants were included in the landscaping to encourage a resort aesthetic.

The reinforced-concrete pool is fully tiled with a custom mosaic blend, which creates a beautiful effect. The six Atom-Series multicoloured pool lights from Spa Electrics ensure the area can be used at any time, while illuminating the charming hue of the tiling.

Purposefully built on the north-east side of the home, the pool becomes the centrepiece of the outdoor space. The frameless glass fencing and positioning of the pool allow its beauty to be admired from multiple areas in the home.

To protect the solid timber flooring within the home, JB Pool Constructions laid extensive water-proof protection prior to tiling. The inclusion of a Tristar off-peak pump from Hayward Pool Products (Australia) Pty Ltd and a PureSilk water-management system reassures the client that their pool water will remain pristine.

The steps positioned on the far side of the pool allow for easy access to the water. The pool loops around the side of the house, and features limestone steppers that are positioned between the living room and outdoor alfresco area.

JB Pool Construction works closely with its clients to design and build a swimming pool that meets their individual needs. Based in South-East Queensland and northern New South Wales, the company specialises in residential pools that reflect the high quality for which JB Pool Construction is renowned. The director of the company, Jamie Bramich, has more than 22 years of experience in the Gold Coast swimming pool industry, which ensures your outdoor space will be in skilled hands.

From the initial site inspection, quotation and design, all the way through to contractual documents, engineering, certification and local council approvals, the helpful team will walk you through every stage to ensure you're completely happy. JB Pool Construction guarantees high-quality service, a remarkable work ethic and designs that speak for themselves.
